

Christchurch City Council, in partnership with TRAFINZ, invites you to attend a unique opportunity to engage with - top road safety specialists at a TRAFINZ post conference tour when they visit Christchurch.

These international presenters will present on the 'safe systems' approach and will cover what has been learnt from the NZ's and Australia's 2010 Road Safety Strategies failures to achieve targeted outcomes for NZ and Australia.

The key theme is that we have ten years to change the world in terms of road safety. The change required will impact on all aspect of NZ society, as transport is a fundamental part of NZ's prosperity, health, accessibility, safety, personal security and vitality.

To make this change, we need to provide people with the appropriate tools so they can make a positive difference to road safety outcomes and move away from our culture of blame by together creating a 'safe system' for all road users. All individuals can make a difference and champions can come from top down or the bottom up, so let's make it happen in NZ.

Tony Bliss, Lead Road Safety Specialist, World Bank

New Zealand transport safety into the future and what we can learn from 2010.
