	1. Traffic management		<input type="checkbox"/>
	2. Road and roadside design for safety		<input type="checkbox"/>
	3. Meeting needs of principal road user groups		x
	4. Integrating transport infrastructure and land-use		<input type="checkbox"/>
	5. The transportation profession		<input type="checkbox"/>
<b>Presentation title</b>	BUS LANE OR CAR PARK		
<b>Presentation Remit</b>	<p>The road is an asset. In these days of congestion and high fuel costs the motor vehicle is competing for this space with sustainable transport. Councils traditionally give the car priority, using all available space for motorists, whether travelling or parking. Legislation such as the RMA, LTMA and the LGAAA for Auckland, has established sustainable management and integration of land use with transport as key to future planning but can Councils bite the bullet and surrender one of their most valued assets to the bus?</p>
