<b>Presentation title</b>	Auckland regional transportation Model Update		
<b>Presentation Remit</b>	<p>The ARC engaged SKM (in conjunction with Beca, David Simmonds Consultancy and David Young ) to develop a new regional model for Auckland to replace the current ART model. The new model will include a fully interactive landuse model providing a powerful tool to forecast the interaction of transportation and landuse in the Auckland region.</p> <p>This remit will update the progress and form of this model and also report back on the significant data collected as part of this process, including interesting results from the Household travel survey undertaken and how this data is available for use.</p>
